

R Dhanush Kumar

Software Engineer

B.Tech. (CSE) graduate from IIIT Dharwad with 4+ years of experience in ITSM and ServiceNow development. CSA and CAD certified, specializing in platform configuration, scripting, integrations, workflow automation, RPA, and AI-powered solutions using Now Assist, Skill Kit, and Virtual Agent. Delivered automation and process improvements that increased operational efficiency by 30–50%.

EXPERIENCE

CGI, Bengaluru, India - Software Engineer

July 2022 – Present

TotalEnergies

- Implemented **ServiceNow Now Assist Skill Kit** to extend ITSM capabilities with **GenAI-powered workflows**, covering Incident, Request, and Knowledge Management.
- Designed **custom AI skills** for intent detection, ticket summarization, and auto-solution recommendations, achieving **~30–40% auto-resolution rate** for L1 ITSM tickets.
- Integrated **ServiceNow Virtual Agent with GenAI services**, reducing Mean Time to Resolution (MTTR) by **~35%** and improving First Contact Resolution (FCR) by **~25%**.
- Built AI-driven enrichment pipelines using **enhanced description and contextual search**, improving ticket classification and routing accuracy by **~25%**.
- Optimized ITSM processes and AI execution flows to reduce operational overhead, contributing to **~20% cost reduction** and measurable KPI improvements (SLA compliance, MTTR).

BELL

- Led **full-scale migration architecture** from Digitek to ServiceNow, including data model mapping, workflow redesign, and phased cutover strategy for **100% of legacy users**.
- Recreated Digitek UI and business logic in ServiceNow using **UI Builder, Client Scripts, Business Rules, and Script Includes**, maintaining **>95% functional parity**.
- Designed and implemented **REST-based integrations** to ingest and synchronize external system data into ServiceNow, reducing manual data entry by **~60%**.
- Built a **dynamic orchestration framework** using **Flow Designer + Scripted Actions**, capable of processing arbitrary inputs and routing them to the correct ITSM/CSM modules.
- Integrated **RPA automation** (bot-driven workflows) to handle repetitive and rule-based tasks, eliminating **50%+ manual touchpoints** and improving data consistency.

Implemented robust **error handling, logging, and retry mechanisms** across flows and integrations to ensure platform stability and auditability.

Valmet:

- Optimized ServiceNow workflows utilizing JavaScript, leading to a 20% increase in system performance and a 15% reduction in downtime.
- Engineered multiple ServiceNow modules including Incident, Problem, and Change

Skills

ServiceNow
JavaScript.
C++.
Fullstack development

Tools and software

ServiceNow
BMC
Android Studio
Git

Languages

English
Tamil
Telugu
Kannada

Certifications

Java Professional

Service now : Certified System Administrator (CSA)

Service now : Certified Application DeveloperCAD)

Python Beginners

Servicenow : Virtual agent

Management, increasing system reliability by 15%

- Created automated workflows and scripts on ServiceNow, significantly reducing manual process time by 35% and minimizing human error.
- Designed a self-service portal for end-users, increasing portal usage by 30% and lowering request load on the IT support team.
- Worked on Virtual Agent and NLU Integration models to reduce agent workloads.

ServiceNow : Predictive intelligence

ServiceNow : Flow designer

Now migration:

- This Project is to develop and enable data migration features from Remedy to ServiceNow.
- Assisted in the development and deployment of ServiceNow applications for different ITIL processes, contributing to a 10% increase in operational efficiency.

TelecoNow:

- This project is to develop a custom predictive flow for a product order and summarize the issue based on the previous fallouts.
- If a task is found to have a predicted fallout, agent is given earlier remedies to fix these fallouts/issues.
- Complete a Customization on user end portal pages, customized flows and rules to follow an end-to-end process.

Internal:

- POC on different ServiceNow projects.
- Worked with UI actions, UI policy, Client scripting, Groups, Form designing, Workflow, Business rules in ServiceNow.
- Integrated new technologies into existing systems, increasing capabilities and improving overall performance.

Sony India Software Centre Private Limited, India - Intern

Jan 2022 – June 2022

- Developed a C++ model bridge between all IOT devices and server.
- Converted python-based sources to C++ and machine level language.
- Assisted in bridging all IOT devices to Google's IFTTT.
- Integrated voice and scheduled commands to devices.

EDUCATION

Indian Institute of Information Technology, India - B.Tech.,

Computer Science and Engineering

2018 - 2022

Projects

Consult - Live consultation

- Built a single page application for consulting doctors.
- Used HTML and CSS for front-end, python for backend and mongo dB for database.
- This Website was built for cross-platform and optimized for different roles of users.
- The Website also sends alerts on live chats and predict patients' health conditions using symptoms.
